

A Complete Materials and Testing Management Solution for Apparel Development, Testing and Quality Assurance

Texbase Materials and Testing management software solutions power great product experiences.

Intelligent and integrated, the Texbase Materials solution is the most advanced material management system in the world and is currently used by major brands around the globe. Materials are easily defined and managed for performance and compliance standards with clearly defined test methods. Texbase Testing delivers powerful tools to capture, analyze and report on the physical test data that defines product integrity and creates an environment where testing practices and standards are consistent.

Fiber, Yarn, Fabric, Component and Product Libraries

Specifications Templates and Test Standards

Certification Management

Data Management with User Privileges and Global Access

Real-Time Collaboration Network

Actionable Dashboards for Workloads and KPIs

Web-Based and Easy-To-Deploy Solution

Enabled with connectivity across the Texbase real-time collaboration network, Materials and Testing securely facilitates brand, vendor and lab communications, testing against specifications and certifications.

Texbase Materials and Testing compliments Product Lifecycle Management (PLM) systems and enables Brands to be efficient, compliant and innovative.

Texbase Materials and Testing Featured Functionality

Fiber, Yarn, Fabric, Component and Finished Product Libraries

Automation tools that provide visibility across suppliers for development and sourcing teams to increase efficiency and reduce cycle time.

Specifications Templates and Guides

Intelligent specification templates define performance, and establish social and regulatory tolerances for raw materials and finished products.

Electronic signatures fully automate and certify the specification process for reduced cost and increased speed to market.

Certification Manager

A certification management system that organizes approved materials based on end-user or environmental criteria into a searchable database accessible by all team members.

Centralized and Standardized Data Management

Data is captured using easily configured testing protocols and standardized testing measures, accessible globally to generate real-time testing calculations, and manage quality and testing history.

Seamless Integration with Internal and External Testing Labs and with Suppliers

The Texbase secure collaboration network delivers visibility across the supply chain, enabling improved supplier performance, delegation of work flow and increased quality and control.

Dashboards

Dashboards provide KPIs, development status and views into test status and volume.

Texbase Technology

Texbase software purpose-built by industry and technology experts, delivered as a service using a secure cloud infrastructure and is accessed by a web browser. The system is standards-based using best-in-breed software, hardware and management practices. Multi-layer security architecture ensures data protection and secure collaboration, and the infrastructure is housed in a Tier-3 data center providing redundancy and resiliency.

About Texbase

Texbase provides compliance, quality and materials management software solutions that power great product experiences. We innovate quality assurance data management, supplier collaboration and product compliance solutions for the apparel, footwear and consumer products industries. Texbase is a pioneer in web based business solutions and collaboration platforms that unite brands, retailers, suppliers and testing labs that trace compliance and quality from raw materials to finished product.
