

Track and Trace Information Throughout the Entire Business Process and Supplier Ecosystem

Texbase understands the complexity of managing the disparate data sources associated with product development and supply chains. The Texbase solution includes the most advanced data management capabilities for apparel, footwear and consumer products companies.

Supply Chain Tiers

Data Driven Action

Supplier Performance Management

The solution is developed on a foundation of data to facilitate decision making and collaboration between brands, suppliers and independent testing labs. Out of the box, Texbase is enabled with robust and preconfigured supply chain collaboration capabilities including supply chain mapping.

Materials, Testing and Compliance Integration

Supplier Collaboration

Texbase Supply Chain Mapping aligns supplier relationships at every tier of the supply chain for exception management and visibility. Supply Chain Mapping (SCM) defines the relationships between Companies and the roles they play in supplying products or services. This is especially important when defining traceability within supply chains in pursuit of Quality, RSL, Sustainability, Corporate Social Responsibility, Conflict Mineral and other critical initiatives that demand an understanding of the organizations involved in delivering the goods or services that you provide to your customers.

Texbase Supply Chain Mapping Featured Functionality

Multi-Dimensional Mapping

Supply Chains can be defined across a variety of dimensions.

- Companies
- Fabrics
- Components
- Product/Seasons

Texbase Supply Chain Mapping provides the insight and foundation for achieving transparency and traceability.

Powerful Visualization

Grid and Hierarchical mapping.

Easy to Use

Texbase Supply Chain Mapping is intelligent and template driven with the flexibility to define relationships using contact information within the Texbase solution.

Texbase Technology

Supply Chain Mapping is software purpose-built by industry and technology experts, delivered as a service using a secure cloud infrastructure and is accessed by a web browser. The system is standards-based using best-in-breed software, hardware and management practices. Multi-layer security architecture ensures data protection and secure collaboration, and the infrastructure is housed in a Tier-3 data center providing redundancy and resiliency.

About Texbase

Texbase provides compliance, quality and materials management software solutions that power great product experiences. We innovate quality assurance data management, supplier collaboration and product compliance solutions for the apparel, footwear and consumer products industries. Texbase is a pioneer in web based business solutions and collaboration platforms that unite brands, retailers, suppliers and testing labs that trace compliance and quality from raw materials to finished product.
