Traceability Begins with VPEPexchange

Join Leading Brands, Retailers, and Suppliers to Improve Product Development, Compliance and Sustainability with Chemical and Environmental Information

Developed by Texbase, in partnership with the American Apparel & Footwear Association (AAFA), **VPEPexchange** is a subscription-based collaboration platform that allows chemical suppliers to author and publish Voluntary Product Environmental Profiles (VPEPs). VPEP is a supplier disclosure with vital information on the chemical constitution of products and the associated environmental impact of apparel, textile and footwear products and processes.

With **VPEPexchange**, suppliers securely share VPEPs with interested stakeholders such as customers, manufacturers, brands or retailers. System notifications alert suppliers when consumers request to view their VPEPs and when documents are downloaded. VPEPs are centrally accessed, downloaded and managed.

Simple-to-use and browser-based, **VPEPexchange** allows suppliers to create and share VPEP documents with VPEP stakeholders.

Join the world's leading textile manufacturers and technologies automating chemical management with **VPEPexchange**.
