## **Texbase Delivers A New Tool for Rapid Lab Test Data Entry**

Bozeman, Montana (January 15, 2018) – Texbase, Inc., a cloud-based data management and collaboration platform for the apparel, footwear and consumer products industries, announced today the launch of Lab Test Data Importer, a new feature enhancement to the Texbase application that enables rapid upload of lab test data.

Lab Test Data Importer allows multiple lab tests to be created at once using a custom excel file. Upon uploading the file to the Texbase system, lab test reports are automatically created, data is transferred, calculations are performed and pass/fail results are instantly available. Lab Test Data Importer is a new feature of Texbase starting first with Texbase Connect suppliers and will eventually be available to other areas of the application.

“This is an exciting enhancement to our application allowing for hundreds of tests to be generated in minutes. It’s key for production lab data where multiple lots are being submitted at once,” said CEO and Founder Joe Walkuski. Lab Test Data Importer will be revealed at Winter Outdoor Retailer in Denver on January 25, 2018.

### **About Texbase**

Texbase provides compliance, testing and material innovation software solutions that power great product experiences for the apparel, footwear and consumer products industries. Texbase is a pioneer in cloud-based business solutions and collaboration platforms that unite brands, retailers, suppliers and testing labs that trace compliance and quality from raw materials to finished product.
