

Powering great product experiences.

Your data deserves more than a spreadsheet.

Texbase is a pioneer in cloud-based data management and collaboration platforms that unite companies, suppliers and testing labs.

With leading solutions for the apparel, footwear and consumer products industries, Texbase's proprietary software allows companies to accelerate innovation, centralize supply chain data and trace compliance from raw materials to finished product.

Texbase includes a variety of modules to help streamline processes, improve product excellence and expedite speed to market. This intuitive platform is easy to implement with out-of-the-box solutions that can be deployed independently or integrated with existing systems.

Texbase Materials

Featured functionality:

- Integrated Fiber, Yarn, Fabric and Component Libraries.
- Manage development projects to stay on track.
- Specifications define performance and compliance requirements.
- Supplier portals ease data collection and shorten timelines.

Texbase Testing

Featured functionality:

- Provides one central location for all your test data and test reports.
- Auto-Evaluation simplifies analysis of results.
- Customizable dashboards provide insight into Key Performance Indicators.
- Easily configured to ensure data integrity across your supply chain.

Texbase Compliance

Texbase Compliance allows companies to measure and monitor the effectiveness of their regulatory, chemical and social responsibility programs.

Texbase Supply Chain Mapping offers management and visibility throughout every tier of the supply chain. This is especially important when defining traceability within supply chains in pursuit of Quality, RSL, CPSIA, Conflict Minerals, Sustainability and Corporate Social Responsibility.

Texbase Color

Texbase Color manages the approval process of lab dips, prints and yarn dyes. Our Color Master helps you define each color being used across your product. Report and track color comments and approval or create beautiful palettes—all with Texbase Color.

Texbase ensures quality while increasing productivity.

Cloud-based software allows internal teams and suppliers to input information directly into the system.

Global visibility of your supply chain, from finished product to each component, fabric and fiber.

Material, Testing, Compliance and Color information is cataloged for future reference.

Integrates seamlessly with PLM and ERP systems.

Easily configurable for sustainability, audits and compliance tracking.

How It Works

Access Texbase from any browser to securely manage your data anytime, anywhere.

TEXBASE SOLUTION

Out-of-the-Box Solutions

Texbase's full suite of services and easy to configure modules come with a number of standard templates, workflows and reports to help you get up and running quickly. Your subscription allows you to use one module or access the entire suite.

Included in all versions of Texbase:

- Texbase Materials
- Texbase Testing
- Texbase Compliance, which includes: CPSIA, CSR, RSL and Conflict Minerals Guardian
- Texbase Color
- Texbase Connect
- Support from our Industry Experts

Client Success

Clients enjoy the benefits of process and technology consulting, comprehensive training and on-going client success engagement.

With 20 years of best practices built into the system and a team of industry experts, the Texbase team is always available to ensure you are able to meet your business objectives.

Texbase Delivers Business Value

- Texbase slashes timelines and increases speed to market.
- Full transparency of your supply chain clarifies communication and enhances accountability.
- Easily review historical data and test results without searching through spreadsheets or PDFs.
- Convenient e-sign capabilities streamline the approval and certification process.

Texbase Connect

Texbase Connect provides secure collaboration between you and your suppliers, manufacturers, customers and independent testing labs—enabling immediate connectivity while enhancing speed to market.

Texbase Connect simplifies the product creation and testing process by allowing global suppliers and labs to share and update information within a secure ecosystem. This capability significantly expedites the materials and testing process and eliminates the need for email and manual transfer of information. The result improves accuracy, communication and collaboration between you and your entire supply chain.
